

55 Point Gutter Clearance & Cleaning Checklist

GUTTER CLEANING CHECKLIST

Access Equipment

- Industrial Triple Ladders
- Micro- Lite Stand Off
- Pointed Ladder
- Halo Access System (if required)
- All Stabilising / Protection Systems

Cleaning Equipment Set Up

- Pro Gutter Tool and telescopic pole
- Baileys Cleaning Rod Set / attachments (if required)
- Gutter Scoop/ Brush / Industrial Bucket
- Petrol Pressure Washer
- Small Handheld Jet Lance / Standard Jet Lance
- 13mm Rinsing System
- 6mm Pre-Wash Hose
- 6mm pure water system hose
- Prewash telescopic pole with Ultimate Brush
- Pure water telescopic pole with DuPont Brush
- Cleaning Applicators / Hand Brushes

Gutter Clearance

- Assess shape of gutter channel and select appropriate Pro gutter tool
- Check outside tap fitting is suitable. If not fit correct attachment and connect pressure washer / rinsing system
- Set up pressure washer / rinsing system with small hand Lance.
- Fit micro lite standoff onto triple ladders
- Always start from the highest section of guttering first and work your way down to the lowest section, to prevent spillage into cleared, clean gutter.
- Set up ladders on first section of gutter at highest point and remove joining section to down-pipe
- Assess condition of gutters whilst there to help establish best placement of ladders.
- Pressure blast inside of joining section and thoroughly clean outside with Premier Algae - Free / Hand brush
- Place industrial bucket under down-pipe to collect falling debris/ water
- Move ladders to optimal position of guttering and secure safely using required stabilising/ protection system
- Remove any loose moss from roof line close to guttering to prevent it blocking guttering, use a low-pressure blast/ stiff brush to do this.
- Use Pro gutter tool and telescopic pole/ gutter scoop and brush / pressure blast to safely remove all debris from gutter channel.

55 Point Gutter Clearance & Cleaning Checklist

Gutter Clearance

- Pressure blast gutter channels pointing towards down-pipe, leaving all gutter channels clean
- Check level of industrial bucket under down-pipe periodically and dispose of water and waste when required into the appropriate reciprocal. (Check with customer)
- Replace industrial bucket back under down-pipe until all debris has been removed and pressure blasting is complete.
- Water test the downpipe to ensure water flows freely and there are no blockages
- If the downpipe is clear and water flows freely, replace removed joining section to gutter and test for leaks. If it leaks, seal with the correct product from van.

Clearing Blocked Downpipes

- Using power driver unscrew all downpipe clips supporting down-pipe
- Completely remove down pipe section and use Bailey drain rods/ pressure blast to clear downpipe
- Ensure the whole length of downpipe is clear before replacing clips.
- Water test to ensure water flows freely before replacing removed joining section to gutter.
- Brush up any fallen debris from path/ patio areas and lightly pressure blast any soiled areas.
- Repeat this process for each section of guttering specified on worksheet

Here's Just a Few Important Reasons to Trust Us with Your Gutter Care

- ✓ We use state of the art van mounted cleaning systems giving you a deep, thorough clean that's unrivalled
- ✓ We use specialist access equipment to ensure we can tackle the most challenging gutter clearance & cleaning jobs safely and efficiently for you

55 Point Gutter Clearance & Cleaning Checklist

Cleaning Fascia/Soffits/Gutters Stage 1-4

- Prewash FSG with Premier Algae- Free Chemical wash
- Thoroughly clean all areas of FSG with Ultimate Brush and Algae - Free
- Adjust angle of brush head, if required to clean all soffit areas thoroughly with Ultimate Brush and Algae- Free
- Pay special attention to gutter clips and joint sections where dirt and algae accumulate and clean thoroughly.
- Always clean the end caps and all downpipes thoroughly with Ultimate Brush and Premier Algae- Free
- Thoroughly rinse off chemical wash with 13mm low pressure rinse.
- Apply UPVC Treatment to white FSG only and clean all areas thoroughly.
- Target the stubborn joint sections and clips with a higher concentrated mix.
- Wash off chemical residue with low pressure rinse and repeat process until UPVC is whiter and brighter.
- Check all areas from different angles to ensure all areas are thoroughly clean.

"I cannot recommend this company highly enough. 10 years of grime and green ALL GONE. My gutters, drainpipes and soffits are like new again. Mark was so efficient and extremely professional. No mess afterwards at all. If I could give more stars I would. Do not hesitate to use them" Elaine 27

Cleaning FSG Stage 1-4

- It may not always be possible to make all areas of guttering look like NEW. Jointed areas will be the toughest. Manage customers expectation. Black guttering can also fade and there is little that can be done about this.
- Check for dirty water drips along soffits and gutter line, when rinsing process completed, especially on vented soffits because these will run and leave unsightly marks.
- If you see water drips, set up ladder and wipe vents over with a Premier Micro- Cloth or Set up a Micro - Cloth on a large applicator pad and attach to telescopic pole to safely clean from the ground.

A Sparkle that Stands Out Stage 5

- Pre- wash all windows, sills, frames and doors with Premier Wash
- Wash off all chemical residue with 13mm low pressure rinse
- Thoroughly clean all windows, sills, frames and doors with Pure H2O and leave with a sparkling, smear free shine.

Going the Extra Mile: The Job Report

- Complete Job Report listing all works completed with images. Note any potential issues you have spotted whilst working on the property in the advisory section, which may be important for the customer to know.
